

## The SE Option from Adams Rite: Smart Electrification for Security, Silence and Savings

Electrification is a key element in any modern access control system, and the new SE (Silent Electrification) Motorized Latch Retraction Option for Adams Rite exit devices is one of the most secure, quiet and convenient ways to electrify a door opening for optimum security and performance.

The SE Option features near-silent operation, and a low current draw that allows for lighter gauge wiring and a reduced amperage power supply. This means no more heavy, bulky and EXPENSIVE power supplies to specify and install. It's perfect for offices, schools, hospitals, hotels and apartment complexes. Get increased functionality and control with combined electric latch retraction and electric dogging.

For security pros trying to balance price and performance, the new motorized SE Electrified Exit Devices improve the door operation by providing a powerful, whisper-quiet, flexible and energy efficient solution as an alternative to traditional solenoid-driven devices.

### Main Features:

- Motor-driven latch retraction
- Near-silent operation
- Low current draw
- Pre-load capable
- Combines latch retraction and electric dogging
- Available with 3000, 8000 Series Exit Devices and The RITE Door®

### Specifications:

- Option Designation: SE ex. 8611SE
- Power: 24 VDC - 0.4 A run current 0.2 A hold current
- Non-polarized hookup
- Rated for intermittent and continuous duty
- Opens electrically with 100+lbs. of preload
- Touch-pad retracts when activated electrically
- Self-calibrating motor drive
- Automatic recycle feature if bar is blocked from fully retracting
- Retraction time: 0.8 seconds
- Can be combined with request-to-exit option (ex. 8611SEM)
- ANSI/BHMA A156.3 Grade 1/UL Listed
